

Advanced Primary Care Management

If you live with complex health needs or conditions, Advanced Primary Care Management (APCM) services can help you manage your health and achieve your quality of life goals.

Bluestone APCM services include:

Support between in-person visits
We work with your living community, pharmacy and specialists to coordinate care services.

Dedicated healthcare team
We create a comprehensive care plan to help manage your health goals.

Care management
We provide support if you experience an emergency room or hospital stay to help you through these transitions.

Benefits:

- Receive personal attention from a provider you know and trust.
- Keep your goals top of mind with a comprehensive care plan that honors your wishes.
- Feel supported between visits with communication through our online portal — The Bridge.

Talk to your Bluestone doctor, nurse practitioner or physician assistant to learn more about APCM services available to Medicare beneficiaries.
